

# Mayfield Pond

Mayfield Twp., Somerset County  
area 140 acres

# MAYFIELD POND

Brighton Plt. and Mayfield Twp., Somerset County  
U.S.G.S. Kingsbury, Maine (7½')

## Fishes

Landlocked salmon	Minnows
Brook trout	Golden shiner
Splake	Blacknose dace
Rainbow smelt	White sucker
White perch	Hornpout (bullhead)
Chain pickerel	Banded killifish
	Redbreast sunfish

## Physical Characteristics

Area - 140 acres

Maximum depth - 41 feet

Principal fishery: Brook trout

Temperatures:

Surface - 66°F

39 feet - 44°F

Mayfield Pond is located north of Foss Mountain. Inlets entering the north and south corners include Bigelow Brook. The pond's outlet is a wide thoroughfare into nearby Kingsbury Pond. Its shoreline is partially developed.

Kingsbury and Mayfield Ponds are managed as a unit, because a thoroughfare that allows free migration for fishes joins the two. Water quality in Mayfield Pond is good for coldwater gamefish. Salmon and splake are stocked and provide fisheries. Growth is good, despite heavy competition from other fish species, because a healthy smelt population provides forage to the salmonids.

Mayfield Pond is accessible via the thoroughfare from Kingsbury Pond. A boat launch site is located at the northeast end of Kingsbury Pond. The pond is open under general law in both the summer and winter fishing seasons. See the lawbook for additional regulations.
